PROFESSIONAL EXPERIENCE

Full-stack developer

BrainBite.ai 🌐

07/2024 – 07/2025
Netherlands

- Built an AI-powered learning platform serving 5,000+ users, integrating LLMs for personalized learning.
- Designed scalable web applications with Nuxt.js, achieving 30% faster load times and seamless Supabase integration.
- Delivered 15+ features in a team of 7, adhering to Agile sprints and ensuring high-quality releases.

Full-stack developer

The New Boston Coin 🌐

04/2024 – 07/2024
Pasadena, United States

- Developed a cryptocurrency platform expected to be used by 10,000+ users, creating dynamic interfaces with React.js and secure APIs with Nest.js.
- Increased performance by 25% through optimization of blockchain data rendering and API response times.
- Collaborated with a team of 6 engineers, ensuring timely delivery of milestones using Agile practices.

Full-stack developer and Tech Lead

Sail Technologies 🌐

08/2025 – 06/2026
NY, USA (Remote)

- Led the development of Sail's core web platform multiple internal tools, an AI-powered marketing solution for hotels and restaurants that drives direct bookings across Google, social, and ChatGPT. Built responsive interfaces with React.js and scalable backend services with Nest.js/Node.js.
- Transitioned to Tech Lead, guiding a team of [X] engineers with Agile practices to enhance code quality, architecture, and on-time delivery.

SKILLS

Web Development

React, Nest.js, Node.js, Express, Next.js, Tailwind CSS, Supabase, Django

Software Engineering

TypeScript, Python, JavaScript, Git, GitHub, Algorithm Design, Software Architecture

EDUCATION

Bachelor Degree in Software Engineering

Addis Ababa University, AAiT

09/2021 – present
Addis Ababa, Ethiopia

- Pursuing a **Bachelor's degree in Software Engineering** with a **CGPA of 3.7+**
- Actively contributed to multiple class projects, often taking on **leadership and key technical roles** to ensure successful project completion.
- Engaged in hands-on learning and practical applications, working on projects to solve real-world problems.
- Developed a solid foundation in core areas of software engineering, including **algorithm design, software architecture, and system optimization**.

PROJECTS

FairMED Medical record centralization

10/2023 – 02/2024

Streamlining Patient Data Management for Efficient and Accessible Healthcare

- Designed and developed a system to **centralize patient medical records**, enabling efficient storage, retrieval, and management of healthcare data.
- Implemented features to ensure **data accessibility** and **secure sharing** across healthcare providers, improving collaboration and patient care.
- Utilized modern technologies and best practices in **web development** and **database management** to create a scalable and user-friendly solution.
